

# ACCESSORIZE WITH COLOURED EYES

Protea Products Ltd brings a new range of accessories to the market enabling you to make the ultimate statement. Eye2Eye Contactz ... the name says it all; monthly disposable cosmetic lenses available in 5 colours and 3 tones giving you enough possibilities to co-ordinate with any mood or outfit.

Eye2Eye All-In-1 lens solution, inclusive of a lens case, is the perfect solution to care for your new look lenses; it cleans, rinses, disinfects, stores, wets, lubricates and has the added advantage of protein removal, unlike many other available brands. Wearing comfort can be enhanced by the use of the handy-size rewetting drops which compliment the range.

If there are worries about how to remove

*See opposite page for further details*

your lenses, Protea Products Ltd has even taken care of that, with the introduction of Contact2, a soft lens removal system, which minimises any risks associated with trying to remove lenses with dirty fingers or long finger nails.

Protea's core business, since 2000, has been the wholesale and distribution of pharmaceuticals, medical supplies and healthcare products. This is evident in the many other brands currently marketed through the company's extensive Pharmacy customer base:

**RescuDerm** – an effective skin treatment to combat the pain and discomfort of Sunburn and minor domestic burns.

**IceFeel** – the compact, velcro-fastening, ice cold, compression bandage for sprains and sporting injuries.

**Visual home test kits** – complete double home tests to determine the indicative levels of total cholesterol and blood glucose in the body.

In summary, from looking your best to feeling your best, make sure you visit Protea Products Ltd at stands T5 & M6.
